Collaborative Image manipulation

Goal:

Find an **HTML5**-based image collaboration open source project that we can integrate in Tiki, like we do for jQuery, CKeditor, etc. Done. We added SVG-Edit to become Tiki **Draw**.

Related feature request:

- Image Manipulation (image cropping, color changing, watermark, etc.)
- can not embed svg images in wiki page
- Animations
- Visual Mapping
- Visualization
- WebGL

Features

- To be able to add an image (jpg, png) and draw over it.
- Version history (like wiki pages, files, trackers and spreadsheets)

**HTML5 / SVG**

- [http://www.pixastic.com/](http://www.pixastic.com/) (the lib is licensed MIT)
- Draw

**PHP**
