Fonts

All this should be handled/discussed on http://themes.tiki.org/Fonts

Two most important links:

- The WebFont Loader is a JavaScript library that gives you more control over font loading than the Google Web Fonts API provides. The WebFont Loader also lets you use multiple web-font providers. https://github.com/wikimedia/jquery.webfonts
- http://fontcustom.com/
- Use any font in Tiki (not just web fonts) HTML5
- doc: Fonts and Google Web Fonts
- themes: Fonts
