Modules

In Tiki, a module is simply a box of content that can be placed in layout areas (eg: topbar, left, right, bottom, etc) and also in text areas (eg: wiki pages). All modules are included with the default Tiki installation.

Module box toggles, tabbed displays, and WYSIWYG / Normal editor switching seem to be flaky; may be jQuery interaction
- Usability
- Consistency
- Conflict of two features (each works well independently)
