PluginMemberList

Example:
http://tiki.org/Community+Team

- Need to show RealNames (like elsewhere) Done in Tiki5
- Names should be clickable so we can know more about these people and contact them Done in Tiki5
- Header should be overrideable: with blank or alternate title
- User picker should have AJAX Done in Tiki5
- If group name is incorrect, should have an error message? Done in Tiki5 (no error message but is blank)
  ◦ Shouldn't be possible to add members
- Add a watch group feature to know who joins/leaves
