Status:
Tiki Wiki CMS Groupware version 10 "Sun" is out and available for download.

We are now looking forward to release Tiki 10.1 that will include fixes and some backport.

Status will be regularly updated

Discussion about the release on BBB:
Tuesday 13 November 2012 from 17:56 GMT to 19:10 GMT
On Thursday 01 November 2012 from 15:27 GMT to 16:22 GMT
On Tuesday 23 October 2012 from 11:27 GMT to 12:13 GMT

Even though this is just after the LTS, there are not that many architectural changes. Upgrades are expected to be smoother than to Tiki4 and Tiki7.

Testers, please use review the Pre-Dogfood Server and report issues below.
