### Open or Pending errors

#### 27 Jan 17

**New**

**Xavier de Pedro**

**Title**

Export Spreadsheet as csv with code to produce svg chart includes the svg output tags in the csv cell instead of the tiki syntax to generate the chart

**Category**

- Conflict of two features (each works well independently)
- Error
- Dogfood on *.tiki.org site
- Less than 30-minutes fix
- Support request

**Version**

- 15.x
- 16.x
- 17.x

**Feature**

- Charts and Data Visualization Import-Export Spreadsheet

**Importance**

#### 16 Aug 17

**New**

**Xavier de Pedro**

**Title**

display a single chart with plugin sheet fails (with mode simple=y or n)

**Category**

- Conflict of two features (each works well independently)
- Consistency
- Error

**Version**

- 15.x
- 16.x
- 17.x
- 18.x

**Feature**

- Spreadsheet

**Importance**

#### 30 Nov 16

**New**

**Xavier de Pedro**

**Title**

Feature to discuss wiki pages in forums sends a notification email (group watches) each time the user clicks at the button 'Start discussion' (even if the discussion and thread was already started by someone else previously)

**Category**

- Conflict of two features (each works well independently)
- Error
- Less than 30-minutes fix

**Version**

Show More

Things that need to be done

Improvement

- Admin pages (option orders and sections)
  - Features
  - Wiki

Updates

*The usual suspects*

- jQuery
- jQuery UI
- Font Awesome
- Bootstrap
- etc

Experimental Branches

*Some branches to be merged back into trunk before branching*

- h5p Done
- conversejs for Openfire XMPP integration done for Tiki18 but it's OK.
- casperjs for Browser Automation Done
- Expose IDS Done
- Hopefully ZF3 if in time Done

And then we really should remove all dead experimental branches this time! done by Jonny (good job!)

Other fixes

- Search the database for TIMESTAMP fields with default value 0000-00-00 00:00:00 as these break with mysql 5.7+

Discussions

- Composer Dependencies Revamp done for Tiki17
- Datavis Convergence proposal is in discussion for Tiki17 No other work is planned for Tiki17. A lot has been done, and some things are clearer and some things still unclear.
Experimental / Unavailable / Duplicate check

Experimental and Unavailable are by nature temporary status. Or an option/preference/feature is underwork, under evaluation or about to be discarded or it is complete and good to be flagged as Basic or Advanced preference.
A review is needed to check and the Experimental / Unavailable and what should be done;

- Changing the flag to Basic or Advanced
- Remove it (or prepare the removal for the next version)
- Keep it as it is with verification to the team working on it they are still willing to complete it

https://dev.tiki.org/Endangered%20features

Candidate for removal (TBD)

- #IE Image Fix (Admin -> Miscellaneous) - Correct PNG images alpha transparency in IE6 (experimental)
  - +1
- Wiki Lingo feature as it is an abandoned project
- — jcapture— r61759, r61764r61765
  - TODO: update documentation
- FAQs
  There has been discussion about this feature being retired, so keep in mind that normal wiki pages can be used to create and display FAQs.
- Image Gallery
  File galleries should be used instead.
- Script and process partially done
- More work need to be done (may be overflown in Tiki18)
- HTML pages
  - https://doc.tiki.org/HTML+Pages (last page modification is 2010)
- HTML Feed
  - https://doc.tiki.org/HtmlFeed not found
- FutureLink-Protocol
- Reports
- Group Alert vs Group Watches
  Do we need both of (almost) the same?
- PluginSourceForge
  Dev list was pinged 0 answers

Candidate for approval (TBD)

We have also some options, features, etc that are still tagged or placed in experimental section as they are working fine and used by many.

- jQuery Infinite Carousel (experimental at : "tiki-admin.php?page=features#contentadmin_features-interface")
- jQuery Sortable Tables (experimental at : "tiki-admin.php?page=features#contentadmin_features-interface")
14 pages link to Tiki17

- Browser Automation
- Business Plans
- Composer
- Composer Dependencies Revamp
- Composer Web Installer
- cron job handing via Tiki
- DevMenu
- Install optional libraries in Tiki via Composer
- Intrusion Detection System
