Upgrade Wizard

Users upgrading from previous Tiki versions might like to know which are the new features and improvements added in that new Tiki version they upgraded to. In a similar fashion to the Profiles Wizard or to the Admin Wizard.

For the sake of simplicity, let's consider to show just the new features and changes for upgraders since the last LTS version (Tiki9 in the case of Tiki12; from Tiki12 for versions 13, 14 & 15).

Proposal of Preferences to be included in that Upgrade Wizard (note that some of them are already shown in previous screens, at the admin wizard), with a warning that some of them might be still experimental or beta and "use with caution" in large production sites, etc.

2. use wysiwyg inline (?)
3. switch between wysiwyg and plain text editor (was that added between 9 & 12?)
4. ...
1.4. Other infos

You need to set cron jobs for several Tiki features, if you use them:

- unified search index (highly recommended)
- daily reports (optional)

See Cron

1.5. New in Tiki 13

New settings and features coming in Tiki13 (Taken from doc:Tiki13 )

1.6. Related doc.t.o pages

Iframes showing doc:Tiki12from9 and doc:Tiki13
