

How to set minimum requirements in Tiki

This page is to document how/where to set minimum requirements in Tiki.

The following files need to be updated:

File	Description
setup.sh	Update the constant <code>REQUIRED_PHP_VERSION</code> used in composer
doc/devtools/etc/update/software-versions-required.txt	Update min and max values for PHP and Tiki versions
lib/core/Tiki/Package/ComposerCli.php	Update the value for <code>PHP_MIN_VERSION</code> constant
tiki-check.php	Add or update different warning messages for different PHP versions, search for the usage of <code>PHP_VERSION</code> constant
tiki-install.php	Update the check that PHP version is sufficient
tiki-setup.php	Update warning messages and the check that PHP version is sufficient

Here are previous examples:
