# Release date

As discussed at the last webinar and meeting, the release date will be at the end of January 2015. Branching will happen once Jonny completes the main fixes he has currently pending.

## Roles

### Release Coordinators

- Nelson Ko (main coordinator)
- Bernard Sfez

### Developers

- Jonny B
- Bernard Sfez (coordinating effort to involve support from Nelson and his team)

### Testing

- Torsten (I am upgrading and developing a few semi-productive and productive sites with pre-14)
- Geoff (I'm hoping to get my main servers onto php5.5 in time for this so my existing test site(s) can be used)
- luci (will go through the blockers list and check if they are still valid...)
- Bernard Sfez getting minimum viability test done and coordinating

### Packaging

- Jonny B (can assist)
- You? (*volunteers welcome*)

### Documentation

- Gary (chibaguy) - Especially about creating, adapting and installing themes, and about adjusting site content to be responsive, etc.
- You? (*volunteers welcome*)

### Communications

- Bernard Sfez to coordinate communication (Rick and Torsten ?)

### Profiles

- Bernard Sfez (bsfez)

### Checklist

This is just a checklist the details about [how to release](#) are on the page : [How to release](#)

## 1. Pre Branching operation

1. Create and update relevant page over all t.o websites
  1. Version page (add your name)
  2. Update dev menu (add your name)
  3. Update Wishlist categories (add your name)
2. Database and technical checkup
  1. Check \_tiki.sql suffixes (add your name)
  2. Check Structure (add your name)
  3. Check Drop table (add your name)
  4. MyISAM and Innodb (add your name)
  5. Check SEFURLs (add your name)
  6. Make sure CDN version is in sync with code (add your name)
  7. Review all external links and make sure URLs are still active (add your name)
  8. Check JSLint (add your name)
  9. Check the README file for manual commits (add your name)
  10. Remove any out of sync English strings (add your name)
  11. Generate preference report (add your name)
  12. Check security (add your name)
  13. Check that external software library dependencies are up to date (add your name) - See [Tiki 12 Composer Dependencies](#)
    - Coming soon;
    - [http://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/14.x/vendor\\_extra/](http://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/14.x/vendor_extra/)
    - <http://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/14.x/composer.json>
  1. Integrity
  2. Security
  3. General up-to-date-ness
14. Check [byte order mark](#) (add your name)
15. Prevent directory browsing (add index.php) (add your name)

## 2. Create the new branch (add your name)

## 3. Post branching operation

1. Create new category on dev.tiki.org (for bug reports) (add your name)
2. Adding new branch to demo (add your name)
3. Add the new branch to show.tiki.org
4. Add link to new branch [Daily Build](#) (add your name)
5. Adding new branch to [Get code](#) (add your name)
6. Update \$profilesLink (add your name) Isn't it obsolete ?
7. Make featured profiles for this new version (add your name)
8. Update Pre-Dogfood Server to Tiki14.x
  1. nextdev.tiki.org (Amette & Gary)
  2. next.tiki.org (Amette & Gary)
  3. nextdoc.tiki.org (Amette & Gary)
  4. nextthemes.tiki.org (Amette & Gary)
  5. nexttv.tiki.org (Amette & Gary)
9. Test min 30mn the website
  1. nextdev.tiki.org (add your name)

2. next.tiki.org (add your name)
  3. nextdoc.tiki.org (add your name)
  4. nextthemes.tiki.org (add your name)
  5. nexttv.tiki.org (add your name)
4. Tiki 14 Alpha release (add your name)
    1. Calling community to install from scratch and upgrade previous version (add your name)
    2. Updating t.o websites
      1. dev.tiki.org (add your name)
      2. tiki.org (add your name)
      3. doc.tiki.org (add your name)
      4. themes.tiki.org (add your name)
      5. tv.tiki.org (add your name)
    3. Test min 30mn t.o website
      1. dev.tiki.org (add your name)
      2. tiki.org (add your name)
      3. doc.tiki.org (add your name)
      4. themes.tiki.org (add your name)
      5. tv.tiki.org (add your name)
    4. Calling community to test t.o websites (Bfez)
    5. Moving back next website to trunk
      1. nextdev.tiki.org (add your name)
      2. next.tiki.org (add your name)
      3. nextdoc.tiki.org (add your name)
      4. nextthemes.tiki.org (add your name)
      5. nexttv.tiki.org (add your name)
  6. Tiki 14 Beta release
    1. Packaging (add your name)
    2. Package testing (add your name)
    3. Upload to SourceForge.net (add your name)
    4. Announcement (Bsfez)
  7. Test by test team in coordination with wish list team (add your name)
  8. Tiki 14 release
    1. Packaging (add your name)
    2. Package testing (add your name)
    3. Upload to SourceForge.net
    4. Security signatures (add your name) - IE:  
[http://sourceforge.net/projects/tikiwiki/files/Tiki\\_12.x\\_Altair/12.0/Verification/](http://sourceforge.net/projects/tikiwiki/files/Tiki_12.x_Altair/12.0/Verification/)
    5. Announcement (Bsfez)
    6. Add to <https://tiki.org/All+Releases> (Bsfez)
      - Update missing previous releases are missing from that page (Bsfez)
    7. Admin panel update notifier
    8. Update lib/setup/twversion.class.php after the release
    9. Special: Restore search feature from profiles (add your name)

# Upgrade

Upgrading to Tiki14?

See notes here:

<https://doc.tiki.org/Tiki14#Upgrade>

## Developments expected to be in Tiki 14

### 1.1.1. Federated Search

see [Federated Search](#)

### 1.1.2. Organic Groups

see [Organic Groups](#)

### 1.1.3. New theme for tiki.org sites.

At this point, the best path seems to be to use luci's ideas as posted on the tikiwiki-artwork list. I'm adjusting the FiveAlive-lite theme options accordingly, but the Javascript and CSS bits for hiding the header on scroll and so on will need to be done. Some options:

- <http://osvaldas.info/auto-hide-sticky-header>

In this connection, I want to disentangle the theme options of FiveAlive and FiveAlive-lite, which got stretched or broken from Tiki 13 to 14. FiveAlive themes use background images more extensively; Fivealive-lite options were meant to share those images, which used to happen but this is now broken and the images got duplicated unnecessarily in the relocation of stylesheets from "styles" to "themes". I think at this point it's better to use either no background images or lighter-weight ones for FiveAlive-lite options. Also I'll redo the options as small files that import the parent, rather than as complete Bootstrap variants, to facilitate their use again as actual option files.

On this topic, we discussed theme options at the meeting. How themes are made, stored, selected and so on has gone through a change from Tiki 13 to 14. Here are some pros and cons, etc. about Tiki's theme option feature, pre-Tiki 14:

Pro:

- Easy method to make a theme variant without Less.
- Reduces near-redundancy in theme selector.
- Keep conceptually or visually similar themes together.
- Makes use of the "cascading" aspect of CSS.

Con:

- Extra server request needed. (does not apply if "Minify CSS into one file" is used)
- Increases complexity of theme file hierarchy and theme selection interface.
- Isn't consistent with the Bootstrap theme production method.

Other:

- Retains legacy method rather than replacing with more-standard theme method.

At the meeting there seemed to be a general consensus that theme options are a worthwhile feature that should be reimplemented.

### 1.1.3.1. Less and CSS naming convention

Thanks for the votes, **Option A** has been picked, see below for details.

If you missed the voting and strongly disagree with the outcome, write to the dev mail list.

Details

### 1.1.4. Tiki Addons framework

see [Tiki Addons](#) (page will be created asap)

### 1.1.5. Icon Sets

What is needed for Tiki 14 or can it be done later?

- This is pretty much implemented already (thanks to gezza) although there are some questions:
  - What to do when there's no appropriate icon in the font (or is this a problem?)
    - If an icon is not defined in an icon set, than the icon in the default (font-awesome) icon set is used
  - How to add another icon set - I added another icon font at a trunk site and made the files similar to the packaged sets but the icon set doesn't show up in the L&F selector.)

More information:

- <http://dev.tiki.org/Icons>
- <http://themes.tiki.org/Icons+SVG+or+Fonts>

### 1.1.6. Old Icons

Some old icons are still present in trunk, and they might need replacement to fit the new bootstrap themes and icon sets.

#### 1. Icons in the setup Wizards

- `img/icons/wizard16x16.png`
- `img/icons/large/wizard_profiles48x48.png`
- `img/icons/large/wizard_admin48x48.png`
- `img/icons/large/wizard_upgrade48x48.png`
- `img/icons/large/admin_panel48x48.png`
- ... (and all the images shown in all the screens of the wizards, located at `img/icons/large/*.png`)

#### 2. Icons in the main app. menu: Example:

- Home: `img/icons/large/home48x48.png`

3. Categories management (see tiki-admin\_categories.php )
  - img/icons/page\_edit.png
  - img/icons/cross.png
  - img/icons/key.png
4. Category watches (see tiki-browse\_categories.php with watch and group watch enabled; and where ever else in tiki that would show these icons when the feature is enabled)
  - img/icons/eye\_arrow\_down.png
  - img/icons/eye.png
  - img/icons/eye\_group.png
5. Watch by categories: missing icon
6. Structure navigation bar: Home, Arrows, etc.. Example:
  - Home: img/icons/house.png
  - Right arrow: img/icons/resultset\_next.png
  - Management: img/icons/chart\_organisation.pngApply profile "Structured Master Documents" and you will see that easily reproduced.
7. icon to add new event in a calendar from the module calendar\_new and upcoming events, add blog post at last posts module, etc.:
  - img/icons/add.png
8. Icons shown by the "Since last visit" (new) module with jquery mode, like in dev.t.o:
  - img/icons/large/wikipages.png
  - img/icons/large/comments.png
  - img/icons/large/trackers\_new.png
  - ... (see all references to png images from the same php/tpl files that handle that module)
9. rss icon (used in the rss module, and in other places when rss activated, I guess):
  - img/icons/feed.png
10. Icons shown by the [Connect](#) feature
  - img/icons/connect\_like.png
  - ...

## 1.1.7. Renaming of Admin X

Renaming of 'Admin X' (home, panels, wizard) with 'Config X' or similar

See discussion on the devel list.

[https://tiki.org/tiki-view\\_forum\\_thread.php?comments\\_parentId=53018](https://tiki.org/tiki-view_forum_thread.php?comments_parentId=53018)

First round of proposals: Committed in r53014, r53016, r53022, r53044

Second round of proposals: Committed in r53190.

Chosen naming:

'Menu > **Settings**'

'Menu > Settings > **Control Panels**'

## 1.1.8. Reindenting of templates

Usually, we recommend not to correct indenting or general formatting of code we don't touch, so as to make merging more manageable. This works well in the short term, but after a while it is obvious a lot of template files have become too messy for maintenance.

What makes fixing bugs especially difficult is the mix-up of tabs and 2-spaces and 4-spaces indentation and non-indentation and some overly creative bits. This makes it impossible to figure out which closing if or which closing tag matches which opening one, or knowing which big code section is self-contained.

Reminder: **Our indentation uses tabs rather than spaces**

So, between the stop of the automated merges from trunk to 13.x and the fork of 14.x, I have volunteered to fix a maximum of these template files, so we can kind of restart on a clean slate.

A good sign of a troublesome indeting is looking for two consecutive spaces, and this returns more than 600 files... 😞

We'll see how far we can go.
