

History

This page is to plan/discuss/review all the features related to history of changes in Tiki:

- improvements to the wiki (including diff) history feature.
- tracker item history
- sheet history
- etc.

Open & Pending

Discussion

- It should be easy to see changes by clicking next/previous edit (like Wikipedia)
 - Or even have a *play* button
 - Perhaps the diff section in AJAX to be faster
- [Wiki editing: Preview with diff, like Mediawiki -> http://dev.tiki.org/EditUIRevamp#Preview_amp_history](http://dev.tiki.org/EditUIRevamp#Preview_amp_history)
- ~~Added things should be in blue (or something) (see Wikipedia)~~ 4.x is pretty clear now.
- Compare button is not obvious or easy to use/find. Should be bigger and more intuitive as it's the most important action of this page.
- When comparing 2 versions, it would be nice to see the *Edit Comment* nearby
 - But this will be tricky when there are more than one...
- Picking diffs like Wikipedia would be more intuitive
 - Unless someone expresses a use, not let people pick the diff (the checkboxes) right to left. So "from" should always be left choice, and "to" a future version on the right
 - Now, it's possible to compare version 3 with version 3 (shouldn't be possible)
 - Same thing should be done in diff mode (from trunk 2010-01-30)
- It should be easier to use the various diff styles (perhaps buttons for the most important ones?)

Nice to have

- Page rename should be in the history
 - Easy?
- Need pagination because it's very slow when there are hundreds.
 - But picking diffs will be tricky

- ~~Should be easy to bookmark/email/post a specific diff view~~ now, full URL is always available (even if long)
- Perhaps a way to merge successive edit by the same person?
 - Jonny added something in [Tiki5](#)

Client-side diff options

- <https://github.com/danvk/codediff.js>
- <https://github.com/cemerick/jsdifflib>
- <http://codemirror.net/demo/merge.html>
- <http://www.mergely.com/license> "Mergely is written with the aid of Code Mirror and jQuery javascript libraries, and uses HTML5 canvas to markup the differences between documents. It will work in most modern browsers."
- <http://xiphe.github.io/jQuery-Merge-for-php-diff/>
- todo: research others

Other related software

- <https://tools.ietf.org/tools/rfcdiff/changelog> (interesting UI to compare RFCs)
