

Sitemap

There are a few ways to do this in Tiki.

New [SiteMap](#) feature in Tiki 9.2

Graphviz

Via a [Menu](#)

Via a [structure](#)

Via a [Visual Mapping](#)

Via [Wiki 3D](#)

or manually in a template or a wiki page

Sitemap wishes

To show Links with no Permission for anonym - turns external Sitemap creation in a disasterarea 302	2013-11-04	0

Idea, maybe make a sitemap from menu? ex.:

An example...

```
{menu id=45 style=sitemap level=0,1}
```
