

Organic Groups

August 2019 update: As part of [Addons Cleanup](#), the concept of [Organic Groups](#) will be possible in Tiki core from Tiki 20 as [Templated Groups](#)

The concept of organic groups is that they can be born, grow and die without requiring the involvement of an administrator. More specifically, these are groups that are created by users and then subsequently managed by the creators of those groups by themselves (and also possibly other group leaders that they choose to add as well).

See also the documentation on the doc site: [Organic Groups](#)

At two:TikifestFosdem2016 it was decided that there would be a need to enhance the core capabilities within Tiki to have the concept of Roles before doing Organic Groups, otherwise it would be difficult to manage a larger number of groups that have already been created in the longer run. The development of that the [Organic Groups Addon Proof of Concept](#) will continue after the development work for Roles is complete.

But in general, it would already be possible to configure organic groups like functionality, even though management of groups could be somewhat cumbersome.

Target for Tiki 4.0 14.0, after a few TikiFests in 2014.

This section (and any further info about "wishes") should be converted into wishes at the tracker, so that people can vote, comment, discuss, etc.

Desired functionality that does not exist yet.
Groups and category integration.

- *inherit permissions. New content inherits permission from parent onjects, and with wiki pages, inherits permissions from the first backlink (page it was created from).*

In the event a user is a member of multiple organic groups, they are prompted to choose - "Categorize as Group/workspace ___ ? (with checkboxes for multiple groups)"

- *organic groups categorization is a separate category permission. a user who is a member of an organic group does not require categorize perms. All group members can add but only group owners/moderators can remove objects.*

[+] Groups

- ~~Define Groups of users.~~ DONE
- ~~Allow new groups to be created by users~~ DONE (Technically with profiles and data channels is possible).
- ~~Users can join groups at registration.~~ DONE
- ~~Submission form exists to join groups.~~ DONE
- ~~Some menu items and content displays only for group.~~ DONE
- ~~Groups can be "open" or "closed"~~ DONE
- open groups:

 - ~~can be joined by anyone~~ DONE
 - moderator can ban or remove users from group
- closed groups

 - invite or apply only
- Should be able to have a picture for a group
- Need a nice way to list all groups

Groups and Categories.

This part of organic groups need to be functionalized by the integration of [workspaces](#) and [perspectives](#).

Creating a group automatically creates a category of the same name with group only access.

combined group/category permission interface - for the "workspace"

"Secure" Groups and "Private" Groups

idea: a secure group is a group such that it is not possible to create non-group content. A private group is one where content is "secure" by default but not mandatory.

- "secure groups" such that all new content created by group members is categorized automatically in the category for that group.

If an object is created by group member a prompt appears on first save

"Categorize as Group/workspace ___ ? (with checkboxes for multiple groups) "

- this popup *does not require categorize perms* so all group members can add but not all can remove objects.

Groups and Trackers

if tracker linked to a group, subscribe from Plugin SUBSCRIBEGROUP should go to insert tracker item:
link to [Bug/RFE](#)

Community

shoutbox specific for group.

internal message to group.

group activity statistics.

invite to group by email.

~~email (newsletter) to group~~ DONE

Security

All groups have 1 "owner" and >1 "moderators"
owners can:

- transfer owner to other moderator
- create/remove moderators
- disband group with "remove" or "make public" option for group objects.

Moderators can:

- add or remove objects from group
- assign view or edit permissions to members.
- invite, approve and remove members.
