Description
I switched from LDAP Pear:auth to "Tiki-Only" where Users can Register BUT need a confirmation from the admin.

The admin got a Message like this
...
To Confirm.... klick:
tiki-login_validate.phpuser=user1&pass=c3746eb1baa6d209128b392680a5329c
...

The question mark for PHP-Code is missing so and the Link is invalid. I've to copy the Link and paste the question mark manually

Solution

This seems to be a bug or missing features with Smarty. Because the Smarty output is bad.

Should be fixed in CVS now.

Still not fixed, seems to be a Smarty bug that should be fixed in the next release of Smarty.
