Description

Using 1.9.cvs

Viewing this page as admin:

http://www.moviments.net/dreerca/tiki-admin_calendars.php

I get this warning 10 times on top of the page:

Warning: in_array() [function.in-array]: Wrong datatype for second argument in /home/httpd/tiki19/tiki-admin_calendars.php on line 67

The only calendar defined (default) is public.

ID nom loc participants cat idm prio subscripciÃ³ perso

1 Public n n n n n n permisos elimina editar

Bug is not (apparently) important, but looks awful for newbies installing tiki and trying calendars...

Confirmed using 1.9cvs from July 9th 2007

Importance
