Description
  On tw.o, right now (at Friday 08 Jun, 2007 09:12 CET; 18:12 in Barcelona):

  I got blank screen after submitting a new article submission on tw.o (user xavi, as plain registered user, using Firefox 2.0.0.4 under Window$), and some minutes later, from the same computer but using a different browser and user, I got blank screen after validating that article submission (user xavidp, SeaMonkey 1.1.2 under Window$)... However both actions succeded... (beyond the blank screen), even if they were posted more than once.

  The article was submitted twice (as submission from user xavi), and, it's been posted three times when validated!

  That's the article: http://tikiwiki.org/article150 (user xavidp cleaned the duplication in article submissions; sylvieg cleaned the 2 duplication in tw.o articles)

  Can anybody confirm this is not any issue with my mouse or so?

Solution
  fixed, it seems

Comments

Kimberly Fink 15 Jan 10 17:11 GMT-0000

Retested on tw.o. and determined the following:

(in I.E.) Article Submission gives a Blank Screen

(in FF) Article Submission gives "Fatal error: Allowed memory size of 41943040 byt gives the following
error: Fatal error: Allowed memory size of 41943040 bytes exhausted (tried to allocate 1167384 bytes)
in /var/www/tikiwiki.org/setup_smarty.php on line 164"

Does not reproduce anywhere else.

Philippe Cloutier 17 Jan 10 20:17 GMT-0000

I got similar results, the same in Firefox. IE 8 showed an HTTP 500 error, caused by the same memory
issue. I couldn't reproduce with a 40M memory limit on localhost. We'd need to try increasing the
memory limit on tw.o.
