Description

The field "User Selector", "Header" and "email", "date and time", "JSCalendar" do not work with Wiki Plugin Tracker.

This is true also for "country", "date time". (Franck)

Group selector field also not working properly when using option choices. The user selector works, when not specifying any options, e.g. 1,2.

This bug report is really old and I am pretty sure it's solved for 1.9.8

Tested and OK :

- User Selector
- Country Selector
- JSCalendar
- date and time
- Header
- e-mail
