Description

That's what the mod description says:

```
author: mcfarland last modification: 2006/12/22 01:49:26 by: mcfarland
features/phpcas/COPYRIGHT -> lib/phpcas/COPYRIGHT features/phpcas/README ->
lib/phpcas/README features/phpcas/source/CAS/CAS.php -> lib/phpcas/source/CAS/CAS.php
features/phpcas/source/CAS/PGTStorage -> lib/phpcas/source/CAS/PGTStorage
features/phpcas/source/CAS/PGTStorage/pgt-db.php -> lib/phpcas/source/CAS/PGTStorage/pgt-
db.php features/phpcas/source/CAS/PGTStorage/pgt-file.php ->
lib/phpcas/source/CAS/PGTStorage/pgt-file.php features/phpcas/source/CAS/PGTStorage/pgt-
main.php -> lib/phpcas/source/CAS/PGTStorage/pgt-main.php
features/phpcas/source/CAS/client.php -> lib/phpcas/source/CAS/client.php
features/phpcas/source/CAS/domxml-php4-php5.php -> lib/phpcas/source/CAS/domxml-php4-
php5.php features/phpcas/source/CAS/languages/english.php ->
lib/phpcas/source/CAS/languages/english.php features/phpcas/source/CAS/languages/french.php
-> lib/phpcas/source/CAS/languages/french.php
features/phpcas/source/CAS/languages/greek.php -> lib/phpcas/source/CAS/languages/greek.php
features/phpcas/source/CAS/languages/languages.php ->
lib/phpcas/source/CAS/languages/languages.php
```

And that's what it says to me when attempting to install it:

Warning: mkdir(lib/phpcas/source/CAS/PGTStorage): File exists in c:\archivos de programa\easyphp1-8\www\branch-1-9\lib\mods\modslib.php on line 68 Warning: copy(mods/features/phpcas/source/CAS/PGTStorage/pgt-db.php): failed to open stream: No such file or directory in c:\archivos de programa\easyphp1-8\www\branch-1-9\lib\mods\modslib.php on line 375 features/phpcas/source/CAS/PGTStorage/pgt-db.php to lib/phpcas/source/CAS/PGTStorage/pgt-db.php impossible to copy

Solution

phpCAS authentication is now integrated, so this is out-of-date.

Same in 1.9.9

Copy by the hand phpcas/source/CAS/* in lib/phpcas

another problem somewhere in lib/userlib.php (arround line 270) there is a check for password lenght. But there is no password with CAS and authentication failed. Juste remove these 3 lines.

Hi: After some lengthy poking around to understand the code, and some minor hacking of several source files, I got it working in 2.0RC4. See <http://doc.tikiwiki.org/tiki-index.php?page=Mod+phpcas&bl=y> for documentation of the necessary changes. I don't know enough about how to change/submit code to put those changes into the authoritative source, but hopefully someone who does know will be able to do so.

mrjcleaver 13 Feb 09 19:53 GMT-0000

Looks like none of the files in PGTStorage will install, or are needed (PHPCAS-13). The file mods/Packages/features-phpcas.info.txt manifest might be just wrong to include the following lines:

```
features/phpcas/source/CAS/PGTStorage lib/phpcas/source/CAS/PGTStorage
features/phpcas/source/CAS/PGTStorage/pgt-db.php lib/phpcas/source/CAS/PGTStorage/pgt-db.php
features/phpcas/source/CAS/PGTStorage/pgt-file.php lib/phpcas/source/CAS/PGTStorage/pgt-file.php
features/phpcas/source/CAS/PGTStorage/pgt-main.php lib/phpcas/source/CAS/PGTStorage/pgt-main.php
```

After you've removed these the module will install. Might not work though.
