### Subject

Drawing XML lost after saving with JGraphPad

### Version

1.9.x

### Category

- Error

### Feature

Draw (SVG-edit)

### Resolution status

Out of Date

### Submitted by

onixtw

### Lastmod by

### Rating

★ ★ ★ ★ ★ (0) ?

### Description

After saving a certain graph to the tiki with JGraphPad, the java console reports no errors, the gif appears correct, but the XML source of the drawing on disk is 0 bytes, making it impossible to edit it again.

One way to reproduce it is to save a drawing containing an unconnected arrow. For example: a line attached to a text box on one side and nothing on the other side.

### Solution

Perhaps incorporating a newer version of JGraphPad or something?

Use the new Tiki Draw with SVG-edit

#### Comments

yuth1ker 08 Feb 09 05:04 GMT-0000

How about applying the drawing program JFDraw free version instead of JGraphPad free version? it's better.
