Description

The User-Task-System is working fine but the tasks are not shown in the module. By clicking preview in admin-modules the tasks are shown both in the module-preview and in the module itself. This bug appeared both with updating tw from 1.9.4 to 1.9.7 to 1.9.10. and with a clean 1.10 installation.

Solution

Add a "global $perms" to fix the task preference check. Fixed on trunk in r22072.

1.-how can I Add a "global $perms" to fix the task preference check.

2.-The fix r22072 in which upgade version is. I am working with tikiwiki 3.1
Thank in advance

Philippe Cloutier 06 Mar 10 00:48 GMT-0000

1. You would need to modify your modules/mod-user_tasks.php file.

2. The fix was released in Tiki 4.0.

Terrix 17 Mar 10 18:23 GMT-0000

Hi, I am not into programming and stuff, but i need this module working for my intranet. So i need an
extendet HowTo
I opend modules/mod-user_tasks.php and added
$perms to the global line
but it didn't worked.
What am I doing wrong?

Philippe Cloutier 17 Mar 10 18:41 GMT-0000

The variable you need to declare as global is $tiki_p_tasks
