Description

It *should* work

title To override the title of a menu, add title=Menu. If you have a space in your title, use:
"title="Developer Menu"

<http://doc.tikiwiki.org/Module+admin>

Solution

In 1.9.x only some modules have it set in PHP, e.g. quick edit module:

```
$smarty->assign('module_title', isset($module_params["title"]) ? $module_params["title"] :  
tra("Quick edit a Wiki page"));
```
