Description

When Intertiki is on, mod-login_box.tpl should show some info on the login box reporting where to register in order to log into that site. Example: edu.tw.o., with tw.o registration.

I've done this by hand:

```
Intertiki is enabled. Log in with your account at <a href="http://tikiwiki.org">http://tikiwiki.org</a>. <br><b>New?</b>: <a href="http://tikiwiki.org/tiki-register.php">register at tw.o</a> and come back to log in here.
```

```
Intertiki is enabled. Log in with your account at <a href="http://tikiwiki.org">http://tikiwiki.org</a>. <br><b>New?</b>: <a href="http://tikiwiki.org/tiki-register.php">register at tw.o</a> and come back to log in here.
```

But this could be added more general on tiki, so that it checks whether intertiki feature is on, and get's

the name of the intertiki server from some value at your tiki installation, and then, the message is customized on the login box.
