Description

I created a new forum for LDAP & Active Directory, but I am having trouble moving all the old messages to this forum.

It is possible to do from `tiki-view_forum.php` but it is very time consuming.

If I find a post from the result of a search, I want to be able to move from `tiki-view_forum_thread.php`

- Stats about forums are not updated (minor)
- Do watches follow?

See video feature request:
