Description

Session expiration is producing some losts on forum posts (in a similar way it was happening on wiki edits...). That solution by ricks99 was very smart on wiki edits. Could it be added also (or similar behavior) to forum posts?

update: Do the same on trackers!!! (show some popup if you are going to loose your session on that site)

I had lost that information because I my session (apparently) expired... (maybe there was a conflict of cookies with the ones on other 1.9.9 tiki sites I was logging in and working in right now)...

Solution

same as in wiki edit to reduce information lost by expiration of session?
