I have a fairly large user base on our internal corporate 1.10 tiki and this bug tends to be the most complained about one of all. It seems people really love their Anchors. The sooner this bugger is fixed, the better.

nkoth 02 Jun 08 05:01 GMT-0000

Probably the wysiwyg anchor is the standard fckeditor behavior. If so, the way to fix this is to make that button generate the code for an ANCHOR plugin instead.

kvpreg 01 Apr 09 21:59 GMT-0000

Is there a fix for this problem yet? In versions 2.3 or 3.0? We are having this problem in version 2.2. I'd like our end-users to have the ability to create links to anchors within the same wiki page using the WYSIWYG editor. Using HTML or wikisyntax code is not desirable.

tpinet 10 May 11 16:53 GMT-0000

Still occurs in WYSIWYG_6x profile. See
http://dev.tiki.org/tiki-view_tracker_item.php?trackerId=5&itemId=3828 for more detail.

tpinet 22 Jun 11 14:47 GMT-0000

Someone posted a partial solution (configure HTMLPurifier) on another ticket tiki-view_tracker_item.php?itemId=3828
