Description

Problem noticed here:

http://www.wiki-translation.com/tiki-view_forum_thread.php?forumId=2&comments_parentId=39

I'm trying to log in with my OpenID. I don't have a wiki-translation.com account yet. After validating my OpenID, I'm taken to a Tiki page that prompts me to create a new account on wiki-translation.com to associate with my OpenID. I enter a username and password, but then get the following error: Wrong registration code

Duplicate of OpenID registration does not work with CAPTCHA

Solution

This is solved since r24298 in trunk and branches 3 and 4. This should be fixed in Tiki 3.4, 4.2 and 5.

Workaround

disable "Prevent automatic/robot registration" from tiki-admin.php?page=login
