Description

In tiki-assignpermission.php, if you create a blank level and then, you have blank levels for some permissions, you will get an error like:

The XML page cannot be displayed Cannot view XML input using XSL style sheet. Please correct the error and then click the Refresh button, or try again later. -----
----- Only one top level element is allowed in an XML document. Error processing resource 'tiki-assignper... Notice: Undefined index: tiki_p_take_quiz in tiki-...

And you can't via the interface re-assign the level to that permission. You need to clean the mess in phpmyadmin

If you have phpmyadmin, to reset permissions to original state:

1- go here:

<http://tikiwiki.cvs.sourceforge.net/tikiwiki/tiki/db/tiki.sql?revision=1.214.2.215&view=markup&pathrev=BRANCH-1-9>

2- find "Table structure for table users_permissions"

and copy/paste that section (just that section) in sql commands

lines 4001 to 4191

reported by johnh on #tikiwiki

Maybe 1.10 is affected as well...
