Description

permissions "minor" seems useless on doc.tw.o: registered can't use it even if granted to them
Check it live on: <http://doc.tikiwiki.org>
Login as admin to check that tiki_p_minor is granted to registered. Logout and login again as plain registered user, edit a page, and you don't see the "minor" button.

Registered users need it since it is a part of the interface needed for best interaction with new translation features on 1.10 (minor changes are not counted as new content to a page is being translated; if no minor, then a minor change to an outdated page reports to the up-to-date pages that new content has been added on other pages, and thus, lots of noise is introduced in the community)

Solution

Looks like xavi didn't check whether the option for minor modifications (in <http://doc.tikiwiki.org/tiki-admin.php?page=wiki>) was enabled. I'm closing this assuming it's invalid and enabling the option on doc.tw.o.

Seems ok on branch/3.0 locally for me - ok with everyone else?
