Description

RIght now, it appears that you can only move entire threads. This doesn't allow you to move a single post that's attached to a thread, even though just the one post needs to be relocated, usually to it's own thread.

Solution

Right now, we simply delete and recreate the user's post. It would be easier to move it. If you need an example of how this is done, you can refer to http://www.simplemachines.org/ or http://getvanilla.com/
