Description

Since some weeks ago, afaik (April 2008, or so), menus and menu options cannot be seen for anonymous on several sites that I admin, including edu.tikiwiki.org, if you select some themes.
Example: moreneat.css

On others, like <http://moviments.net/ilp> (using nornia.css), the menu on a module assigned to anonymous and registered, was shown when you logged in. Right now I've just assigned that module to admins only, and used menupage module, which works fine. But I can re-set the previous config. is somebody wants to reproduce the missworking.

Solution

probably fixed
