Description
    Related:
    Modules use should be restrictable with standard permissions

    Read from bottom up:

    2008-05-27 00:46:33 Norrin_Rrr mmh
    2008-05-27 00:45:57 prozaq you could probably modify that
    2008-05-27 00:45:39 prozaq that displays all categories
    2008-05-27 00:45:32 prozaq Norrin_Rrr: in 1.10 there is a module called "categories"
    2008-05-27 00:41:25 Norrin_Rrr will try it
    2008-05-27 00:41:16 Norrin_Rrr the example in the documentation says its for features not sections
    that s weird
    2008-05-27 00:40:51 prozaq oh - yes I think so, but Ive never tried it
    2008-05-27 00:40:34 prozaq beg your pardon?
    2008-05-27 00:39:45 Norrin_Rrr the section parameter in the menu its to set wich section
    (wiki/cms/forums) will display the menu ?
    2008-05-27 00:38:54 Norrin_Rrr that should be doable

2008-05-27 00:38:19 prozaq so you should be able to copy some of the code from the tiki-browse_categories pages

2008-05-27 00:34:38 Norrin_Rrr yes

2008-05-27 00:34:16 prozaq but isnÃ¤t that when you are creating a module from scratch?

2008-05-27 00:34:07 Norrin_Rrr i am not sure but there seems a possibility for hacking ?

2008-05-27 00:33:44 Norrin_Rrr "So if you know about Smarty template editing you can use any Smarty tag in your user modules."

2008-05-27 00:33:05 Norrin_Rrr ah okay i am at the module documentation, and its seems there are some conditionals with TW1.10 for modules but unfortunaty none for specific category

2008-05-27 00:32:56 *** franck has left #tikiwikin

2008-05-27 00:29:43 *** kiilo_ has quit IRCn

2008-05-27 00:28:34 Suprano even more if you paste in in a formular 😃

2008-05-27 00:28:15 Suprano hmmm copying 4mb text slows down the pc

2008-05-27 00:28:10 Norrin_Rrr and display a menu that gather the various item of this category

2008-05-27 00:27:59 prozaq marclaporte: earlier I posted a bug to the tracker item Bugs & Wish list on dev.tikiwiki.org but how do I post to the "All Bugs" section or the "Release 110 taged bugs" ? section

2008-05-27 00:27:38 Norrin_Rrr yes

2008-05-27 00:27:30 marclaporte the goal would be to show a certain module only if current item (page, etc) is in category X ?

2008-05-27 00:26:07 prozaq eek...

2008-05-27 00:25:45 Norrin_Rrr its seems it works for feature enabled on the site but not for category (?)

2008-05-27 00:25:16 Norrin_Rrr yep i have the doc about the menu under my nose but i don't understand the section parameter

2008-05-27 00:24:39 marclaporte hi prozaq

2008-05-27 00:24:24 prozaq marclaporte: hi

2008-05-27 00:24:19 prozaq but IÃ¤m not sure a specific category would fall under that

2008-05-27 00:23:57 prozaq it seems that you can tell a module which "section" it should appear in

2008-05-27 00:22:37 Norrin_Rrr for now 1.9.9 but 1.10 soon i hope 😃

2008-05-27 00:21:20 *** marclaporte has joined #tikiwikin

2008-05-27 00:20:45 prozaq which version are you using norrin?

2008-05-27 00:18:38 Norrin_Rrr i am not sure, a module with a menu would be nice

2008-05-27 00:18:08 prozaq a menu item or a module with menus?

2008-05-27 00:17:29 Norrin_Rrr and hello everybody ;)

2008-05-27 00:16:39 Norrin_Rrr Is it possible to show a menu only when a user reach an item belonging to a given category ?

2008-05-27 00:15:24 *** Norrin_Rrr has joined #tikiwikin

Sylvie has recently added some useful code in BRANCH-1-10 so we can use categories as conditions in templates (.tpl)

Workspace Roadmap

Marc Laporte 28 Sep 12 02:27 GMT-0000

There is a Module Menu.

All modules can be restricted to categories via tiki-admin_modules.php -> Edit a module -> Visibility -> Category / No Category
