    ★ ★ ★ ★ ★ (0) ❓

Description
    Say I include a bunch of pages in one larger page.

    I click edit, and find that it's an included page. I should be able to edit directly that included page (assuming I have permissions), a bit like section edit

    Benefits:

- Each page has independent history.
- They can be edited in parallel.

    Can page renames also survive inclusions?

    Related:

- Wiki page picker (WYSIWYCA) in edit mode, plugin help and anywhere relevant

Solution
     Done.
