Description
Sometimes, first day of the week is Sunday, even if you set that to be Monday on Calendar settings.

This bug shows up for us (catalan interface, time zone "Europe Madrid (UTC+1)" when we have in tiki-admin.php?page=general, at preferecnes syntax:
"1.10 - $prefs.feature_foobar..."

When we swich this parameter to
"1.9 - $feature_foobar"

then fist day of the week in calendar is Monday, as expected
