Description
User with Editor plus sheet edit permission tried to create a Tiki Sheet in v2.0RC4 -Arcturus-.

An error occurred in a database query!

Context:
File tiki-sheets.php
Url tiki-sheets.php
Query:
INSERT INTO `tiki_sheets` (`title`, `description`, `author`) VALUES (?, ?, ?)
Values:
0 testsheet
1 this is a test
2 NULL
Message:
Column 'author' cannot be null
Built query was probably:
INSERT INTO `tiki_sheets` (`title`, `description`, `author`) VALUES ('testsheet', 'this is a test', NULL)

Solution
fixed on svn for trunk, proposals/4.x and proposals/3.x. It will be hopefully fixed in the new stable releases from each branch. thanks space_egd for reporting the fix! 😊.

And by the way, those interested in the dev:Spreadsheet feature, stay tuned with the new development to implement a friendly GUI for spreadsheet such as the one with jquery.sheet.

See report of evolution in http://dev.tikiwiki.org/Spreadsheets ! (already starting to work on trunk, so hopefully implemented in Tiki5 ;-)

Tested on 2.4

User has following permissions :
tiki_p_edit
tiki_p_edit_sheet

Same error returned.

Dominique Meeùs 12 Jun 09 13:04 GMT-0000

I got the same problem under TikiWiki 3.0, creating a new sheet from the Create new Sheet command on the List TikiSheets page as a user with tiki_p_edit_sheet. Same error returned.
Admins do create sheets.
User can edit such a sheet.
An error occurred in a database query!

Context:
File tiki-sheets.php
Url tiki-sheets.php
Query:
```
INSERT INTO `tiki_sheets` ( `title`, `description`, `author` ) VALUES( ?, ?, ? )
```
Values:
0 EssaiDM
1 Essai comme utilisateur
2 NULL
Message:
Built query was probably:
```
INSERT INTO `tiki_sheets` ( `title`, `description`, `author` ) VALUES( 'EssaiDM', 'Essai comme utilisateur', NULL )
```

I encountered this bug as well and since I did not see a fix for it I spent some time investigating.

Firstly I noticed that my admin accounts did not encounter this bug, but members I assigned the tiki_p_admin_sheet permission that weren't admins did encounter this problem.

Below are steps to fix this bug:
(I am in no way saying that this is the best solution to the bug, just a solution)

1. Assign a user/group to have the tiki_p_admin_sheet permission that is not an admin
2. Copy /MainWikiDir/tiki-sheets.php and /MainWikiDir/templates/tiki-sheets.tpl to your local machine
3. Duplicate these files as a backup
4. Find and Replace the following contents of tiki-sheets.php:
   FIND ...
   if ($tiki_p_admin == 'y') {
   REPLACE WITH ...
   if ($tiki_p_admin == 'y' || $tiki_p_admin_sheet == 'y') {

5. Find and Replace the following contents of tiki-sheets.tpl:
   FIND ...
   {if $tiki_p_admin eq 'y'}
   REPLACE WITH ...
   {if $tiki_p_admin eq 'y'
   or $tiki_p_admin_sheet eq 'y'}
6) Clear your wiki's cache just in case
7) Attempt to now create a new sheet with the user/group you assigned the tiki_p_admin_sheet permission to.

Hopefully you'll see that like for my wiki this fixed the issue. And no I don't know php so I won't be able to troubleshoot any problems you may experience.
