### Rating

★★★★★ (0) ?

### Description

a) I spent weeks testing these features one by one.

It will save time if all these features are enabled and complete with samples.

This is the approach used by Joomla and Mambo.

It also helps us learn faster.

b) The assist module is useful but asking users to read a tedious configuration as the first step will eat up too much time.

Site configuration or Look at Feel should be the first one.

It is also the most dangerous but essential.

c) Provide a clue, in the assist if possible, to replace a damaged header.tpl with a skeleton header.tpl

### Solution

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html
PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html xmlns="http://www.w3.org/1999/xhtml" xml:lang="{$language}" lang="{$language}">
<head>
<title>
</title>
</head>

<body>
```

Thanx for your feedback. We are working on a easier configuration tool for 3.0 (name Tiki Profiles). This tool should also be able to add samples for each features.
