### Description

Using tw.o forums and 2.0 (afaik):

You add a screenshot attachment to a reply in a forum post, and if you click on "preview" first, (as you would do on wiki pages), the image is lost (no tag is inserted on the forum post to help you link the attachment).

However, if you do the same attachment on a post, and click to post it (without previewing it first), the attachment link is shown.

Example at tw.o forums where it recently happened:

[http://tikiwiki.org/tiki-view\\_forum\\_thread.php?forumId=4&comments\\_parentId=29608&thread\\_sort\\_mode=commentDate\\_desc&was\\_queued=n](http://tikiwiki.org/tiki-view_forum_thread.php?forumId=4&comments_parentId=29608&thread_sort_mode=commentDate_desc&was_queued=n)

---

according to comment added to this bug report, this issue is still present in branch Tiki5 still (so probably also in trunk)

---

Unbelievable, bug still present in forum posts in 12.x since 1.x! (with forum replies, there is warning, at least, but not yet with brand new posts in the forum and attachment is lost indeed)

Reproduced here:

[http://xavi-9794-1986.show.tikiwiki.org/tiki-view\\_forum.php?forumId=1](http://xavi-9794-1986.show.tikiwiki.org/tiki-view_forum.php?forumId=1)

We are up to Version 5.1 and this problem has been here since we started with Ver 1
