Searching a string of 5 words produces broken output on styles such as mose.css, or dev.tw.o

To reproduce, search at dev.tw.o, for "Political ambient de Ub", for instance (without the double quoting).

If I could upload a file to the tracker you could see a screenshot to view the output I get, in case developers can't reproduce it yourselves. For instance, the first menu says then something like:

```
back;background-color:#A0FFFF;
back;backg
```
