Description
    When I start the installation of Tikiwiki, I wondered why it is only in English.

    Later I read the documentation and know, I should use

    http://your_host/tiki/tiki-install.php?lang=XX

    instead of just enter

    http://your_host/tiki/

    to start the installer.

    But, why make this trick so difficult to be known?

Solution
    Add a drop-down list of languages for the Installer page at the Upper-right corner on each page.
    Then the user can easily choose their favorite language for installation process.

    ML: fixed in 3.0
