Description

Seems like Tanzania keeps falling out of the country list. This was the case some years ago. Might as well add Swahili as a language option if applicable.

Solution

I see it was deleted in an unrelated update, for no obvious reason (a mistake would be my guess):

I put Tanzania's flag "Tanzania.gif" back in the img/flags directory, which is all that is needed for Tanzania to appear again in all country lists.

Considering Swahili support, do we actually have any Swahili translations ? Are you volunteering ?
If nobody does, we would just have a useless Swahili option which leaves everything in english...
Otherwise, there just needs to be a language.php file with Swahili translations in lang/sw/ directory.
