Description

I have created a tikisheet: 7x7 table, with some special characters (ÃfÂ©, ÃfÂ”, spaces, round brackets, comma, ...)

Programari	Sistema Operatiu	LlicÃfÂ”ncia	CatalÃf	Multiplataforma	2000	FunciÃfÂ³
WinK	GNU/linux, M\$ Windows	GratuÃfÂ”t per a ÃfÂ”s no comercial	No (en procÃfÂ©s)	Si	100	Per generar video tutorials
OpenOffice	Linux, Windos, Mac	LGPL	Si	Si	50000	
Firefox		MPL	Si	Si	6000	
Thunderbird		MPL	Si	Si	6000	
Gimp		GPL	Si	Si	2000	
Gaim		GPL	Si	Si	2000	

I've just enabled feature_charts, and tried to produce a multiline chart, but I just got a 100% blank page .

The options requested after multiline chart is selected, are:

TÃfÃtol:	prova
Independant Scale:	(x) Horizontal () Vertical
Horizontal Scale:	(x) Bottom () Dalt
Vertical Scale:	(x) Left () Right
Series:	
label	prova
color	red
style	
x	a1:a7
y0	f1:f7
y1	
y2	
y3	
y4	

(similar to what I saw at the screengrab at tw.o sheet demo

.

But it produces a blank page.

memory limit at php.ini is set to at least 32 Mb, I think (for sure, more than 8Mb or 16Mb)

Updated 6th dec'05:

Warning: Division by zero in /var/lib/gforge/chroot/home/groups/gclub/htdocs/lib/graph-engine/abstract.gridbased.php on line 253,

(and idem on: 475, 278, 278, 253, 475, 278, 278, 437)

Fatal error: Maximum execution time of 30 seconds exceeded in /var/lib/gforge/chroot/home/groups/gclub/htdocs/lib/graph-engine/abstract.gridbased.php on line 450

Still doesn't work for me... :-/

What am I doing wrong?

Solution

Probably to be closed - RETEST! (pre-6th dec'05)

- amette

After some verification, this behavior is expected and unavoidable. While the error messages could be a lot more user friendly, it's not possible to use multiline graph with non-numeric data on the X axis. The X axis in that type of graph uses numeric values and not discreet values like the Multibar graphic.
