### Related-to

- ● Poll permission granularity not fine-grained enough

### Description

If I add a poll in a module, a registered user can see it even though he can't vote.

### Solution

In 1.9.2 CVS:

if user doesn't have tiki\_p\_vote\_poll  
- vote-button doesn't get shown in tiki-poll.tpl  
- tiki-old\_polls.tpl shows "Preview Poll" instead of "Vote"

We still need more perms for polls in general. - see tw#278 and #268
