Description

In a project management mode, you can use watch and alert but not everybody may be watching and alert is extra time.

For small teams and short delays, it could be good to have since_last_visit_new module content to be emailed to each group member periodically.

People get personalized content based on their last login (cool!)

Also, they don't get watches if they login regularly

We would need that also for barter networks
http://dev.tikiwiki.org/cc

Any news?

Maybe discussable during the http://tikiwiki.org/TikiFestBarcelona2 at the discussion about cron-like features in tiki? ;-)
