Description

I am not a TikiWiki developer, but am using the Dutch package for one of my installations. I noted a spelling mistake, but couldn't quite figure out where to report this. I understand there is a wiki-translation project, but I don't want to become a member of that as I don't have the time/expertise, just would like to report the error.

Could there perhaps be a form facility for TikiWiki _users_ to easily make language suggestions, which would then be directed to the persons currently responsible for the language module. If there already is such a form, perhaps the link to it could be made more prominent?
