Description

when I use persian names for pages the "" in wiki outputs something like this

```
<p><a href="#" inhibited_Click="javascript:window.open('tiki-editdrawing.php?page=%D8%A7%D9%87%D8<span style='display:inline;' id='dyn_AF_display'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("AF");' title='Click to edit dynamic variable: AF'>NaV</a></span><span style='display:none;' id='dyn_AF_edit'><input type='text' name='dyn_AF' value='NaV' /><input type="submit" name="_dyn_update" value="Update variables"/></span>D8%A7%D9%81+%D9%88+%D9%85%D8%A7%D9%85%D9%88%D8%B1<span style='display:inline;' id='dyn_DB_display'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("DB");' title='Click to edit dynamic variable: DB'>NaV</a></span><span style='display:none;' id='dyn_DB_edit'><input type='text' name='dyn_DB' value='NaV' /><input type="submit" name="_dyn_update" value="Update variables"/></span>8C%D8<span style='display:inline;' id='dyn_AA+_display'><a class='dynavar' inhibited_Click='javascript:toggle_dynamic_var("AA+");' title='Click to edit dynamic variable: AA+'>NaV</a></span><span style='display:none;' id='dyn_AA+_edit'><input type='text' name='dyn_AA+' value='NaV' /><input type="submit" name="_dyn_update" value="Update variables"/></span>D8%A8%D8%A7%D8%B4%DANaVD8%A7%D9%87&path=/test/tiki&drawing=foo2','menubar=no,width=252,height=25');"><img border='0' src='img/wiki/foo2.gif' alt='click to edit' /></a> </p>
```

in the html code which in browser adds this line to the picture of drawing :

NaVD8%A7%D9%81+%D9%88+%D9%85%D8%A7%D9%85%D9%88%D8%B1NaV8C%D8NaVD8%A8%D8%A7%D8%B4%DANaVD8%A7%D9%87&path=/test/tiki&drawing=foo2','menubar=no,width=252,height=25');">

and also the link for editing the drawing does not work

Solution

mail abbas - need more information - Problem description doesn't tell much...
- amette

Ok, got it ;) - doesn't do as long a text at my place, but adding german Umlauts to the page name, creates the same problem.

ML: Won't fix as feature was removed.
