Description

Hi,

I found an issue using "wikiplugin_files" plugin.

If You try to use it (on Wiki pages or in other available places like parsable ptracker descriptions etc) Wiki page show files in the particular gallery but You can only download file. You cannot update newer version or see a history of that file althou theres an option to do it.

Ive try it both on TW 2 and TW 3(beta).

Ive tried to turn off/on all java UI thingy but w/o success.

Best regards,

Piotr
