Description
Fixed in 4.0

When a Gallery is designated as an audio podcast Gallery with a file folder used for storage, and
files are added to the Gallery they are correctly stored in the file folder BUT the links generated
when a file is downloaded from the Gallery is incorrect.

In my example I set the folder as podcasts/ (in v2.x the path setting for the podcast gallery folder
had to be relative I'm assuming this is unchanged) so the download should generate a link like:

....tikiwiki/podcasts/filename.mp3

Instead the link incorrectly is generated as:

....tikiwiki/filename.mp3 ie the download path is omitted

All non podcast galleries are OK generating the usual:

tikiwiki/tiki-download.... format

This worked fine in versions 2.2/2.3/2.4
