Description

wiki shows no preview in translate edit mode while in normal wiki page edit it's working fine

version: 3.0beta4 SVN

theme: darkroom

browser: FF3

steps to reproduce:

1. enable multilingual features
2. select translate from dropdown where "English" is
3. set the language and pagename for new page serving as translation
4. in the editing mode click preview

Solution

I fixed that in 24458, though I have to hope this doesn't break anything. This should be fixed in Tiki 5.
