Tiki sanitizes the URL parameter of the Redirect plugin | Tiki Wiki CMS Groupware :: Development
Tiki sanitizes the URL parameter of the Redirect plugin

Status

 Pending

Subject

Tiki sanitizes the URL parameter of the Redirect plugin

Version

2.x

3.x

Category

- Error
- Less than 30-minutes fix

Feature

Wiki Plugin (extends basic syntax)

Lastmod by

Rating

★★★★★ (0) 

Description

The Redirect plugin takes two parameters:

- page = foo (to redirect to a wiki page)
- url = http://foo.com (to redirect to any other page)

However, Tiki sanitizes the url parameter, creating url, which breaks the plugin's redirection.

Solution

Tiki should not sanitize the URL parameter of the Redirect plugin.

Could you give an example of a URL which is improperly sanitized?
