Description

As noted in bug tracker id 2474, bullets parameter doesn't create a bulleted list. "All" list is poorly formatted with page links that don't work.

Solution

Below is the patch to fix these issues in lib/wikiplugins/wikiplugin_attach.php. If I'm able to post an attachment after I submit this patch, I'll attach the entire file with the fixes.

Below are the changes:

Line 226 and 238: Concatenation "." added so that bullets appear when elected

Line 226: \$link.= '\$.pageall.; }

Line 292: Changed separator to create a new line for each attachment

```
Line 292 setting of $separator variable replaced with: if ( isset( $bullets ) && $bullets ) {  
$separator = "\n"; } else { $separator = "<br />\n"; }
```
