### Description

I want to allow registration without E-Mail.

Even though I have disabled all E-Mail checking it reports a validation failure.

The function `validate_email` called in `tiki-register.php` does as first task a format check on the E-Mail and returns false if the format is wrong. Empty emails result in false too.

Is this a valid decision at this point?

### Workaround

Works for me solution:

in `tiki-register.php`: Call `validate_email` only if an E-Mail has been provided.

This does not check if a email is needed.

I did not do this in `validate_email` as I'm not aware on the impact on this.
