Ja lang wiki text broken (trunk)

Status

✖ Closed

Subject

Ja lang wiki text broken (trunk)

Version

4.x

Category

- Usability
- Regression

Feature

i18n (Multilingual, l10n, Babelfish)

Wiki Syntax (text area, parser, external wiki, etc)

Resolution status

Fixed or Solved

Lastmod by

Gary Cunningham-Lee

Rating

★★★★★ (0) ?

Description

Unless I'm missing some new admin change, Japanese wikitext support in trunk is broken. At both a 3.1 site upgraded to trunk, and a fresh install of trunk, Japanese text shows as either garbarga characters or question marks. (I know it's a long way until Tiki 4, but trunk is supposed to stay close to releasable.)

Solution

Fixed as of r20215 or so.
